

## About Conifer

Conifer Systems designs, manufactures, and installs state-of-the-art emissions control systems and provides aftermarket services to enable industries to meet and exceed their environmental goals. Our solutions maximize uptime and increase operational efficiencies across all industries.

We are the only emissions control solution provider that can fuel its systems with renewable natural gas, an important green energy differentiator within the market. Conifer Systems empowers companies to decrease their carbon footprint while keeping emissions at bay.

# Environmental Solutions. Redefined.

---

Empowering industries to create a more sustainable future.

---

## Our Vision

We partner with companies to create a more sustainable future by delivering environmental systems that create a cleaner and healthier environment for future generations.

Our standardized solutions enable us to provide high-quality, reliable systems with shorter project timelines and lower costs. Conifer Systems delivers solutions that meet your emissions control needs while prioritizing your business objectives and environmental and compliance obligations. Our technical expertise has been honed supplying systems to various industries for nearly two decades.

## Our Process

Conifer Systems provides a full suite of systems and services for a variety of industries. From the solutions development phase to detailed design, our team will create a custom solution to fit your specifications, process flow, compliance needs and budget.

## Custom Solutions

We design and manufacture high-quality oxidizer, scrubber, and carbon adsorber systems for reliable, efficient, and cost-effective emissions control.

Our experienced team of applications engineers is here to develop the ideal solution for your emissions control needs.

## Aftermarket Services

Our team is trained to maintain and repair our systems and those from other OEMs, regardless of mechanical, instrumentation, or programming issues:

- ▶ Media Change-Outs & Washouts
- ▶ Spare Parts, Replacements, & Repairs
- ▶ Upgrades & Retrofits
- ▶ Preventative Maintenance
